

«Crystal vodka bottle»  
(capacity 0,5l and 1l).

The set includes a bottle, a plunger cork, a crystal cork, and a souvenir box.

This item is designed for an expensive, highly qualitative product. Undoubtedly, the packing shall only arouse sympathy and shall be a sound advertising for the manufacturer. This shall have the necessary impact both on people who are well provided for, and on those with an average income who are simply looking over the «crystal miracle» displayed on the shop window.

We can also integrate crystal tall wine glass and logotypes in the set.

The crystal cork allows you to use the item instead of a carafe. This item is exclusive.

The bottle is totally made of crystal (handicraft) and is signed in 18-karat gold.

We can make any inscription, apply any logotype and image in gold or any kind of color (coloured enamel). Ecologically certified.
